

- Without touching the clutch or brake pedal press the START button once to put the car into the ON position.

- Select **[Install]** from the AccessPORT menu by pressing the **[OK]** button to proceed with installation. Below is a diagram of the AccessPORT's keypad function.

### Vehicle Identification

The AccessPORT will attempt to automatically determine the target vehicle for installation.

#### **If the AccessPORT successfully identifies the vehicle:**

Verify that the identified vehicle is correct and press **[OK]** to confirm.

#### **If an error occurs:**

Please refer to **[TROUBLESHOOTING SECTION]**.

### Map Selection

Once the AccessPORT determines the installation vehicle type, it will present a list of maps from which to choose for installation. The AccessPORT reprograms the ECU with the calibration data from the map file selected for installation. It is important to select the map file that most closely matches the modification level of the target vehicle.

If you are unsure about which map applies to your modification level, please see the map notes and their requirements for the modifications that will best fit your vehicle.

Select a map and press **[OK]** to view detailed information about that map. After confirming that the selected map is correct, press **[OK]** again to proceed, or press **[CANCEL]** to return to the map selection list.

### Save Stock ECU Program Data

Once the vehicle is in ECU reprogramming mode, the AccessPORT will first download the current stock ECU program data from the vehicle. The AccessPORT saves this data for use when uninstalling to ensure that the vehicle is returned to the exact state it was in before the AccessPORT was installed. The download process will take 1-2 minutes to complete.

#### **WARNING!**

**If a previous installation of an AccessPORT is detected, you will be given the option to overwrite it with a new installation. Be aware that the previous installation will be permanently lost and unrecoverable. This detection may occur prior to saving the stock ECU program data, in which case the ECU program data will not be saved. In the case of a previous install, a stock ECU program supplied on the AccessPORT will be used when you uninstall.**
