

Install AccessPORT Programming

After the AccessPORT downloads and saves the stock ECU program data, it will proceed with installation to the vehicle. It is at this point that the AccessPORT reprograms the vehicle's ECU with the new program data and calibration parameters from the selected map file. This process will take 3-6 minutes to complete.

WARNING!

Do not disturb the AccessPORT and the OBD-II cable while installation is taking place. Failure to do so may result in incomplete ECU reprogramming which will render the vehicle inoperable.

Installation Complete

The AccessPORT is now fully installed and ready for use. Turn the key to the OFF position and unplug the OBD-II cable from the vehicle.

The vehicle's ECU is now programmed with new calibration data. The AccessPORT does not need to be plugged into the vehicle for the calibration to be in effect, however, there are other features of the device that may be used at any time.

Please note that the AccessPORT is designed to work with only one vehicle at a time. **Once the AccessPORT is installed, it cannot be used with another vehicle until it is uninstalled from the original vehicle.**
