

Time-of-Use Electric Vehicle Rate

Customer Quick Reference Guide

OVERVIEW

Southern California Edison (SCE) commends you on your interest in the California MINI E Pilot Project. Selected participants will enable MINI to conduct the research necessary to realize our shared vision of cleaner air, a better climate and improved energy efficiency for the future.

If you are chosen to participate in the pilot, SCE offers a special **Time-of-Use Electric Vehicle (TOU-EV-1) rate** for plug-in electric vehicle owners. This rate may be advantageous to you, depending on your electricity usage levels and vehicle charging needs. Contact SCE's Customer Service Call Center at **800-239-2685** to request a rate analysis and determine whether the TOU-EV-1 rate is beneficial for you.

WHAT IS THE TIME-OF-USE ELECTRIC VEHICLE RATE?

SCE's residential TOU-EV-1 rate offers potential cost savings for charging your plug-in electric vehicle during off-peak hours, when overall demand for electricity is lowest. In addition to the possible cost-saving benefit of a lower TOU-EV-1 rate, charging during off-peak hours also helps to further reduce electricity demand during peak hours.

For residential EV charging Time-of-Use rates, "time" is defined as follows:

- On-peak: 12:00 noon – 9:00 p.m. daily, year-round
- **Off-peak: all other hours – daily, year-round**

During on-peak hours (noon – 9:00 p.m. daily, year-round) the TOU-EV-1 rate has a higher per kilowatt-hour cost (kWh).

To be eligible for the TOU-EV-1 rate, plug-in electric vehicle owners should consult with SCE to have a second electricity meter installed at the residential charging location, in addition to the household meter already in place. The additional meter records only the amount of energy used to charge the plug-in electric vehicle.

HOW DO I APPLY FOR SERVICE?

If you are selected for the pilot, once you have discussed electrical requirements and meter installation options with an electrician and have decided to apply for the TOU-EV-1 charging rate, contact SCE's Customer Service Call Center at **800-239-2685**. A Customer Service Representative will walk you through the application process. An SCE service planner will then contact you to schedule an appointment to install the plug-in electric vehicle adapter and meter.

HOW CAN I GET ADDITIONAL INFORMATION?

To request a rate analysis, apply for service or get answers to additional questions, contact SCE's Customer Service Call Center at 800-239-2685.
