Annual fuel cost

\$1,950

Fuel Economy & Greenhouse Gas Emissions

1

This vehicle emits 309 grams CO₂ per mile. Distributing fuel also creates emissions.

Actual results will vary for many reasons, including driving conditions and how you drive. The average new vehicle gets 23 MPG and cost \$11,500 to fuel over 50,000 miles per year at \$3.75 per gallon. MPG is miles per gasoline gallon. CO₂ is a significant cause of climate change and smog.
