

Here are the panels in the order that I removed them.

Loosen tach up to easily remove #2

Panel #	# of screws
1	3
2	None
3	1
4	None
5	4*
6	4
7	None
8	None

*You do not have to remove all 4 screws on the vent cover. The one under the "A" (3) column cover can be left in place. There is enough flex to get to the screw in the knee protection panel.

Here's the grommet and cover that the wiring harness comes through.
